## GeoAware News Release

### GeoDATA 2016 Autumn Series Provides Learning Platform for Geospatial Community

**7 September 2016:** The GeoDATA 2016 geocommunity Autumn seminar series kicks off in a month's time. With a strong focus on learning the remaining one day events in Edinburgh, Brussels and London will provide both an informative and a valuable experience for both accomplished practitioners as well as those new to the world of geospatial technology.

For the first time, the Scottish-based event, set for 6 October 2016 at the Assembly Rooms in Edinburgh, carries the Showcase status. This format, which follows its highly successful London event counterpart organised for 1 December, offers attendees access to a wider selection of talks, a greater number of exhibition stands as well as more free time to network than previously.

Both the Scottish and London Showcase events will demonstrate cutting edge mapping products and solutions throughout the exhibition area and include 20 minute educational seminar streams scheduled throughout the day.

These events will be of particular interest to those involved in CAD, GPS, GIS, cartography, remote sensing, navigation or any other role that utilises mapping data and services.

The Brussels event, scheduled for 19 October at Diamant Business & Conference Centre, simply offers a one day conference entitled "Geospatial Visions of the Future". Industry experts will offer insightful talks on how and where they see the future of the geographic industry in both the short and long term. They will interactively share their plans, ideas and innovations with the audience which will be especially relevant to those professionals who either work with or have a keen interest in spatial data.

Visitors are encouraged to book their free tickets for the GeoDATA 2016 Autumn series as early as possible at [www.geoaware.info](http://www.geoaware.info)

### **Editors' Notes**

GeoDATA 2016 is organised by GeoAware ([www.geoaware.info](http://www.geoaware.info)), the training and events division of The GeoInformation Group.

### **About GeoAware**

GeoAware is The GeoInformation Group's training and events division. Based in Cambridge UK, GeoAware organises educational events and training courses for the geospatial market.

Since its inception in 1999 GeoAware (formerly Training4GIS) has drawn together over 15,000 professionals throughout 90+ events. The events all have one common goal: to provide access to an effective learning platform to those who want to gain more knowledge and share ideas about spatial data and technology.

We organise and host many highly respected events throughout the year. GeoAware's portfolio includes the successful international GeoDATA seminar series, annual FSEC Conference, BCS-SoC Conference as well as specific geo-related seminars.
